Re: Heritage Restoration Inc.

To Whom It May Concern

BASF's Construction Chemicals division offers advanced chemicals solutions for new construction, maintenance, repair and renovation of structures: Our comprehensive portfolio encompasses concrete admixtures, cement additives, chemical solutions for underground construction, waterproofing systems, sealants, concrete repair & protection systems, performance grouts, performance flooring systems, tile fixing systems, expansion control systems and wood protection solutions.

HRI are an applicator in good standing for our Below Grade Waterproofing Systems, Traffic Toppings, Cementitious Waterproofing Systems, Expansion Joint Systems and Sealants. They have successfully applied these systems for over 10 years and we would recommend their competence highly in that regard. As a BASF applicator, we offer HRI all necessary test reports, on-site technical review representation and installation guidance as necessary.

Sincerely,
